## Use the power of your voice with professional digital dictation

SpeechExec Pro Dictation and Transcription Software links authors and transcriptionists. It facilitates communication, the setup of individual workflow settings and organizational flexibility to help save time and resources. Authors can record directly into the software using a dictation microphone and transcriptionists can playback and conveniently transcribe these files using a foot control.

### Efficient document creation

- Workflow management and automation for enhanced productivity
- Worklists for easy work monitoring and tracking
- Encryption and backup functions for highest security
- SpeechLive connection available for even greater mobility

### Professional dictation solution

- Recorder for convenient direct dictation with Philips dictation microphones
- Flexible licensing to access SpeechExec from anywhere, including at home
- Automated file download for quick and convenient job routing
- Geared for professional speech recognition for highest accuracy

### Powerful transcription module

- Transcription player with foot control support for hands-free playback control
- Individual sort and filter options for organization and task prioritization
- Popup alerts for notification of new important tasks

# Highlights

## Efficient workflow management

Easily monitor and manage the workflow between authors and transcriptionists. Recordings and the resulting written documents are automatically routed to the appropriate person for quicker turnaround times.

## Worklists and organization

Worklists help both authors and transcriptionists monitor their work statuses. They save time used for unnecessary status update communication between parties. Files can be organized into sub folders, assigned specific properties and comments and marked as urgent to help organize and prioritize tasks.

## Data security and back up

Real-time file encryption (256 bit) and secure file transfer grant only authorized individuals to access documents. The optional automatic backup function protects data against accidental loss.

## Seamless integration into SpeechLive

Philips SpeechLive cloud dictation workflow solution gives users constant file access via browser for greater flexibility and mobility. With SpeechLive, authors can dictate with their smartphone from anywhere and send dictations directly to their SpeechExec software. It also features a transcription service, where trained professionals quickly type up recordings for the author.

## Integrated recorder and player

With the integrated dictation recorder, authors can record directly into their SpeechExec software. The software works perfectly with Philips SpeechMike Dictation Microphones and allows for quick and easy control of all recording and playback functions such as insert, overwrite and append. Function buttons can be individually programmed for added user convenience.

## Always accessible

Licenses are now assigned to individual users, not to individual PCs, giving you the freedom to work from your desktop at work or from a laptop off-site. This also allows you to easily reactivate a license in case of a hardware failure.

# Highlights

## Automated download

SpeechExec Pro allows authors and transcriptionists to automatically download all their dictations from their voice recorder straight into the software and route to the appropriate destination via their local network, FTP server, SpeechLive or email.

## Individual sort and filter options

Both author and transcriptionist benefit from individual sort and filter options to find dictations and documents even quicker and always stay highly organized.

## New task notifications

Transcriptionists can receive alerts whenever new recordings are assigned to them, making sure no important recordings are missed. These notifications appear on their screen in real-time in a discreet popup window.

## Geared for speech recognition

Speech recognition software from Dragon can be seamlessly connected with solution. Whether the author is dictating directly into the software using a Philips microphone or uploading recorded files from a voice recorder, they will receive accurate speech recognition results which will help speed up their workflow.

## SpeechExec transcription player

The software comes with a conveniently integrated transcription player with pause, fast forward and rewind options. Together with the configurable Philips Foot Control it allows for comfortable and quick transcription. Predefined templates can be used, so documents are automatically created with the appropriate header and footer, saving even more time.

# Versions

## SpeechExec Pro Dictate

The module for authors including the integrated dictation recorder.

**LFH4412:** 2-year subscription

**LFH4422:** 2-year subscription (boxed version)

The module for transcriptions including the integrated player for transcriptionists.

**LFH4512:** 2-year subscription

**LFH4522:** 2-year subscription (boxed version)

# Specifications

## System requirements

**Processor:** Intel dual core or equivalent AMD processor, 1 GHz or faster processor

**RAM:** 4 GB (64 bit)

**Hard-disk space:** 100 MB for SpeechExec software, 4.5 GB for Microsoft .NET Framework

**Operating system:** Windows 11 Pro, Windows 10 Pro/Enterprise (64 bit)

**Graphics:** DirectX-compliant graphics card with hardware acceleration recommended

**Sound:** Windows-compatible sound device

**Free USB port**

**Internet connection for required software activation**

## Additional system requirements for speech recognition software

**Supported speech recognition software:**

Nuance Dragon Professional 13/14/15 Individual/Group, Nuance Dragon Legal 13/14/15, Dragon Medical Practice Edition 3/4

**Processor:** Intel dual core or equivalent AMD processor, 2.2 GHz or faster processor

**RAM:** 4 GB (32 bit)/8 GB (64 bit)

**Hard-disk space:** 8 GB

**Operating system:** Windows 11 Pro, Windows 10 Pro/Enterprise (64 bit)

## Convenience

**Supported languages:** English, German, French, Dutch, Spanish, Czech, Danish, Finnish, Norwegian, Swedish

**Automatic update via internet**

## Audio

**Recording format:** .dss, .ds2, .wav

**Playback format:** .dss, .ds2, .wav, .mp3, .wma

## Workflow

**File transfer:** LAN, email, FTP, Philips SpeechLive

**Automatic download from portable voice recorders**

**Automatic file format conversion at download**

**Interface for automatic transcription with Dragon speech recognition software**

## Security

**DSS Pro encryption:** real-time AES encryption with 256 bits

**SpeechExec encryption:** AES encryption with 256 bits

## Hardware configuration

**Supported hardware:** Philips SpeechAir Smart Voice Recorder, Philips PocketMemo Voice Recorder DPM8000 series, Philips SpeechMike Dictation Microphones, Philips SpeechOne Wireless Dictation Headset, Philips Foot Control

**Configuration options:** device option settings, configuration of slide switch and programmable buttons, keyword configuration, recording profiles, file download, encryption, PIN code protection

## Supported programs

**Email programs:** Microsoft Outlook 2019/2016/2013/2010, Microsoft Exchange Server 2019/2016/2013/2010

**File servers:** Windows Server 2012R2/2016/2019
